Github: <https://github.com/incerto13>

## SUMMARY

Backend and distributed systems engineer with 12+ years building payment, healthcare, and high-traffic consumer platforms. Designed the company-wide disbursements service at a \$2.2B fintech, cutting erroneous transactions and refunds by \$5M+ per year. Led architecture across 17 microservices and a team of 9 engineers spanning North America and Europe. Currently supporting Elasticsearch at 20M+ documents and a 300M-record MySQL database at the largest entertainment casting marketplace in the world.

## SKILLS

Languages: Python, TypeScript, JavaScript, Golang

Backend & APIs: Node.js, Django, FastAPI, Flask, Express, Koa, Nest.js, REST, GraphQL, SOAP, Microservices Architecture, Distributed Systems, System Design

Data & Search: PostgreSQL, MySQL, MongoDB, DynamoDB, Elasticsearch, AWS OpenSearch, Apache Kafka, AWS Kinesis, Prisma, TypeORM, Sequelize

Infrastructure & DevOps: AWS (Lambda, EKS, RDS, S3, API Gateway, Cognito, Amplify, AppSync), Docker, Kubernetes, Terraform, Serverless Framework, CI/CD, GitHub Actions, GitLab Pipelines, Linux, Google Cloud, Azure

Observability: Prometheus, Grafana, Kibana, Sentry

Frontend: React, Redux, Next.js, Angular

Knowledgeable: Golang, Java, Spring Boot, C#, PHP, Android, iOS, Machine Learning

## EXPERIENCE

### Backstage, New York, NY – Senior Software Engineer (Remote)

JAN 2025 – Present

- Backend engineer for the largest casting and talent marketplace in the U.S., serving 3 million unique monthly visitors across actors, models, voice-over artists, and content creators
- Build Python services on Django REST Framework and Django Ninja, working in the Mercurial version-control system hosted on Heptapod (a community-driven fork of GitLab)
- Maintain production Elasticsearch 7 across 20M+ documents and 100+ indexes, with custom indexing through elasticsearch-dsl, bulk operations, and Django management commands for mapping updates
- Cut page load time roughly 23% by paginating 70k+ user profiles with video, image, and sound media assets against a 300M-record MySQL database on AWS RDS spanning 449 tables
- Extended Stripe payments to eligible iOS users, enabling discounted memberships through an expedited mobile authentication flow with HubSpot marketing tracking

### MedGeo, Los Angeles, CA – Technical Lead / Senior Architectural Engineer (Remote)

FEB 2023 – JAN 2025

- Led technical architecture for an early-stage healthcare SaaS company, directing a team of 9 engineers across North America and Europe
- Designed distributed software architecture for healthcare asset tracking, producing architectural diagrams and driving API integration strategy with partners, stakeholders, and third-party providers in the highly technical healthcare space
- Built a distributed system spanning 17 microservices across REST, GraphQL, and RPC interfaces
- Implemented services in TypeScript, Node.js, React, Nest.js, Python, FastAPI, and Wundergraph against PostgreSQL, MongoDB, and DynamoDB, with image analysis via Google Vision API
- Deployed on AWS Lambda, CloudFormation, Amplify, API Gateway, S3, Elastic Beanstalk, AppSync, and RDS using the Serverless Framework, Docker, and bash scripting

### **Chipper Cash, San Francisco, CA** – Senior Software Engineer (Remote)

MAY 2022 – DEC 2022

*P2P mobile payments platform – 10M+ downloads across 10 countries, valued at over \$2.2 billion*

- Designed and implemented the company-wide disbursements service, mitigating risks from unreliable third-party API responses and architecture latency; saved more than \$5 million per year by reducing erroneous transactions and refunds
- Lead backend engineer on two core commerce products (bills, disbursements) built with PostgreSQL, Node.js, Koa, TypeScript, and TypeORM
- Led market expansion into Nigeria and Uganda, implementing REST and SOAP integrations with local payment service providers

### **Railroad 19, New York, NY** – Senior Full Stack Developer (Remote)

DEC 2019 – MAY 2022

- Led modernization of a 20-year-old internal staff scheduling application for NBC Universal, rebuilding it in React and Redux on Node.js with AWS Amplify, AWS Lambda, GraphQL, Apollo, and MSSQL
- Lead frontend engineer on a new distributed energy platform for NYISO using React, Storybook, React Table, and React Query
- Full-stack engineer on everydayhealth.com, a healthcare site with 20M+ monthly visitors, across React, Next.js, Node.js, GraphQL, Apollo, and PostgreSQL
- Built ETL pipelines ingesting third-party feeds from Zocdoc and doctor.com through AWS Lambda, AWS Batch, Node.js, AWS OpenSearch, PostgreSQL, and Sequelize
- Recovered, processed, and reformatted 10M+ emails during a Microsoft Exchange migration for a furniture company with over \$100 million in revenue

### **Freelance / Self Employed, New York, NY** – Senior Full Stack Developer (Remote)

AUG 2017 – DEC 2019

- Led development of a large healthcare marketing website on Next.js, Node.js, PostgreSQL, Sequelize, Serverless, AWS Lambda, AWS Batch, AWS Elasticsearch, and AWS S3
- Built marketing, ecommerce, and CRM platforms with carts, sessions, auth, order processing, and payments, integrating Shopify, Square, HubSpot, and NetSuite across React, Angular, Node.js, Express, Django, Python, and MongoDB
- Designed and shipped a CRM covering client management, email marketing, contact management, task management, and detailed analytics using Angular 11, Python, Flask, GraphQL, SQLAlchemy, PostgreSQL, Celery, Django-Celery, Redis, and Flower; deployed on AWS EC2, RDS, Lambda, Cognito, AppSync, and API Gateway with Docker, Kubernetes, and Nginx

### **Cloutown, Palo Alto, CA** – Senior Full Stack Developer (Remote)

DEC 2015 – AUG 2017

- Developed Python/Django services with a React frontend and PostgreSQL backend, prototyping MVP features and refactoring the REST API for performance, maintainability, and scalability
- Optimized database performance through schema normalization and indexing, and expanded API unit and integration test coverage using Pytest

### **Financial Services**

AUG 2009 – DEC 2015

- Went to graduate school and worked in financial services in an unrelated role

### **Creative Circle, Chicago, IL** – Full Stack Developer

JAN 2009 – AUG 2009

- Architected and developed a CMS and event-scheduling application using PHP, JavaScript, HTML, and CSS for a large housing non-profit

### **Aramark Uniform Services, Chicago, IL** – Systems Engineer

MAY 2006 – NOV 2008

- Built internal systems tracking industrial IoT, downtime, parts inventory, and work orders using JSP, PHP, HTML, and CSS

## EDUCATION

**University of Illinois, Urbana-Champaign, IL** — *B.S.*

AUG 2001 — MAY 2006

Majored in Electrical Engineering, Minored in Mathematics
